Version 3 – What is New

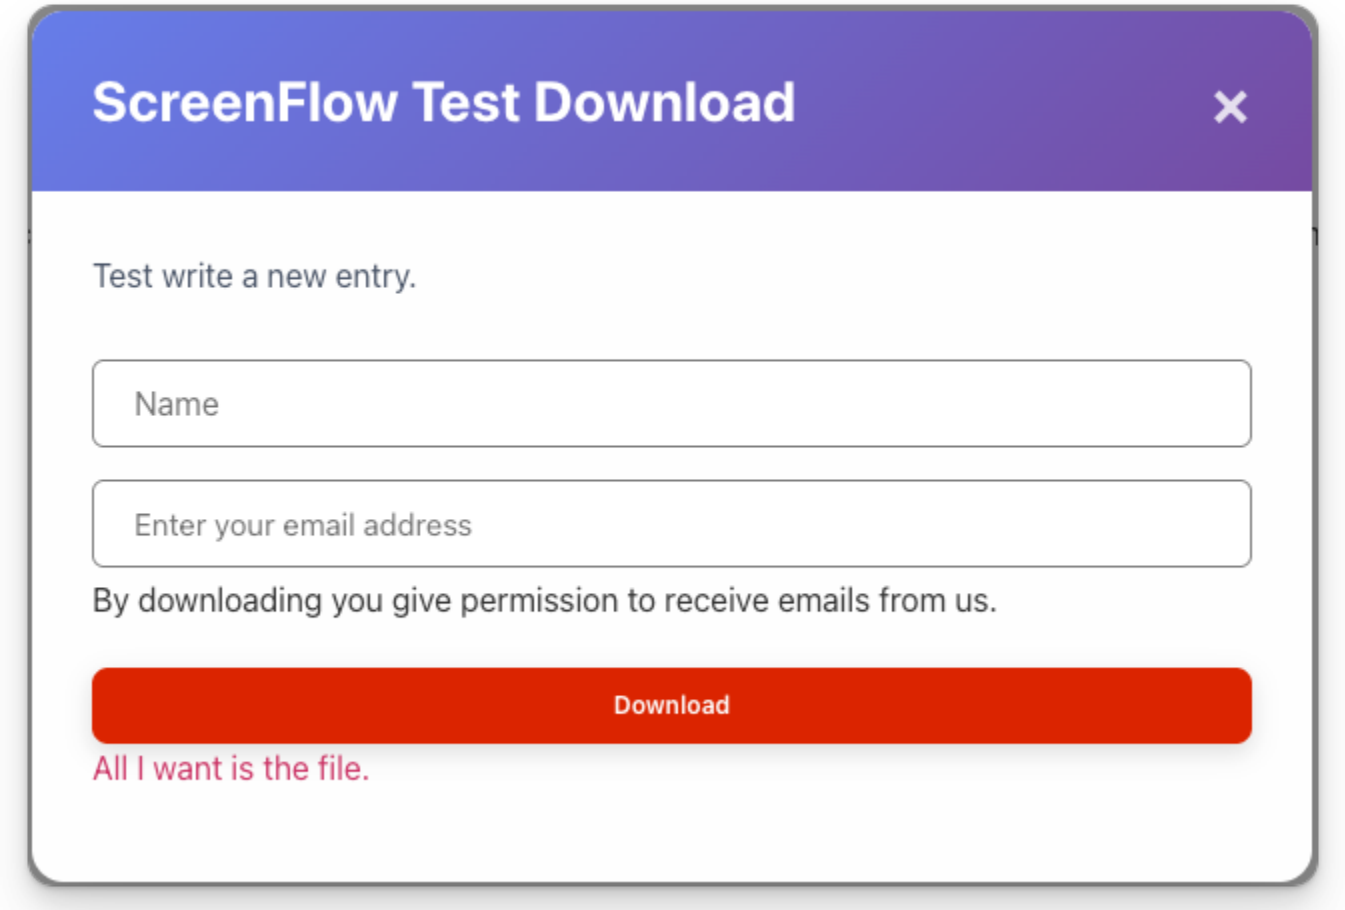

Download Magnet · https://peachysoftware.com/docs/v3whatsnew/

Peachy Software is pleased to announce the release of Download Magnet version 3. The main update was a feature request from an user which made total sense and makes Download Magnet more flexible. Thank you.

New and more Responsive Popups

You told us, we listened.

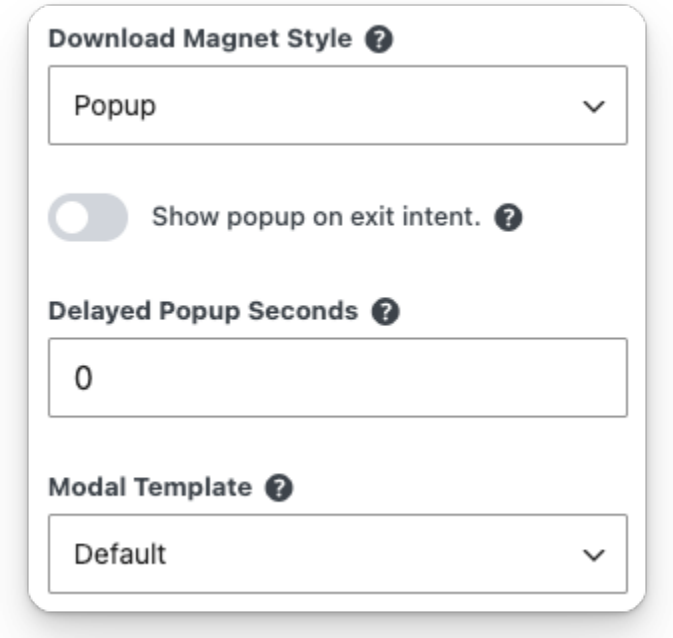

Two New Popup Styles

We added two new pop-up designs and made them responsive. That was a common complaint, so we took the time to make them responsive.

Exit Intent and Show after a number of Seconds

We added new options. You can force the pop-up to appear once it determines the user is about to leave the page. That, and also show it after a predetermined number of seconds.

Coming Soon

The roadmap includes extensions for MailerLite & FluentCRM. We are also looking at email address validators as well. Keep an eye for details.
